granted the National Paving Co. 90 county. At one end is a 6-foot days extension to complete the replica of the official poster that paving of Macdonald avenue. The council took this measure to pro- tising. This is an attractive Spanteet the assessment bonds.

Highway Too Narrow

The highway along San Pablo avenue from Stege corners to Macdenald avenue is a dangerous thoroughfare, made more so by the late storms. It is narrow and skiddy, and a bad mix up is witnessed there frequently, especially at the turn to Richmond, at Cutting. Accidents there are not always due to is cut up, and at night with glaring to create much enthusiasm, among headlights to add to the hazardous those who used to blow off the risk, fatal accidents are sure to foam, and say: "Here's t' ye."

Cloth From Pineannles

In France a new fabric that prom-ises to become popular is made from pineapple fiber. It looks like a mixture of cambric and slik. The idea is ture of cambric and silk. The idea is not essentially new as the natives of Africa have long made their fish nets from the fiber. The fiber does not disintegrate as quickly as cotton material. While the African product is very crude, the skilled process in France makes a superfine cloth, it is

Genius means the transcendent capacity of taking pains.—Carlyle.

Fay Lanphier's Beauty Secrets

A LOT of people ask me how it foels to go all the way across the continent to Atlantic City and then be chosen Miss America. The answer is, I would like to help every California woman make the most of the charms Nature has given her. Much depends on the way you dress—and most of all on the hats you wear.

I have written a book on hat styles which is yours, FREE, if you will just ask me for it. It tells how hat atyles originate, what hat is most becoming to your type, and it illustrates, with my pictures, the hats I wear, which were copied specially for me from exclusive Paris models by a large New York manufacturer. The booklet shows you how to order these stunning sport felt hats direct from New York. You may have it FREE if you will write for it today. I am sure it will help you realine your charms of style and attractiveness. I went you to use the coupon to do the first California women to have these styles. If you wish, write us, stating headsize measured in inches, and color preferred, and we will send to have the pictured above, for \$4.96.

CROOKS PREY ON CLINIC PATIENTS

Infest Little Town Where Doctors Mayo Are Located.

Rochester, Minn.—Gamblers, confi dence men, card sharps, swindlers and tricksters of all types infest the little town of Rochester, Minn. Attracted there because of the hundreds of men and women who seek treatment in the famous Mayo Clinic, these crooks ex act a toil of thousands of dollars a year. Scores are swindled out of their railroad fares, or even their life sav-ings, and the Rochester police have a busy time.

So numerous are the swindlers prey upon the sick in the town that one member of the police department dees nothing but keep an eye on them He has been on the force for many years and knows most of the crooks by sight. When he recognizes them he compels them to leave town or

arrests them for vagrancy, which means a jail term.

Most of the money taken from the sick is obtained through "fake" stock transactions, spurious loans, and in gambling games operated in hotels by professional gamblers of remarkable skill.

tives or friends in Rochester, so they quickly respond to the advances of the strangers. Then plans are laid quietly and almost before the traveler knows it he is robbed.

Very seldom are the authorities able

to recover such losses. The crooks al-ways leave town until the deal is for-

Altar for Bridegroom Cambridge, Mass.—Mrs. Alene Best

Doolin, seventeen, deserted at the altar only to be proposed to on the spot by William H. Doolin, nineteen, whom she met but two weeks before, is now on her honeymoon. Mrs. Doolin was married by Rt Rev Arthur S. Trottman in St. Luke's Afri-can Orthodox church, in the presence of a mixed company. Doolin, an army elerk, is white, as was John J. Halli-

gan, twenty-one, Mrs. Doolin's first Mrs. William Best, mother of the bride, and Bishop Trotman, the choir, and numerous acquaintances were assembled in the church on January 17. Time passed, but the bridegroom did not arrive. The bishop grew impatient, the bride nervous and the moth-

Finally Doolin; a boarder in the Best Finally Doolin; a boarder in the Best household, stepped forward and offered to substitute. Mrs. Best stopped crying. "Go see the bishop," she said. Now the cereinony has been performed, and this time neither bride nor bishop was kept waiting, and "we're all happy," says Mrs. Best.

"Demon Monster" Is

Seen in Canadian Lake Vancouver, B. C.—Another "demon nonster" has made its appearance in British Columbia and the descriptio tallies in many respects with that credited the Okanagan lake mystery creature. The latest addition to Brit-ish Columbia's water curios has been discovered in West's lake, a very deer body of water about two miles wide and four miles long, on Nelson island in Jervis inlet, says H. C. MacCallum.

in the Province. The only white man who claims to have ever seen the "shelllican" is John West, who settled on the foreshore of West's lake 35 years ago.

"In many ways it resembled a tur-tle," said Mr. West in describing the "shellilican." "There were two parts showing above the water, one the head and the other a part of the back. The head was about the size of the of a calf, the cheeks were yellow and its features were like those of a mon-key. The visible part of the back was about six feet long and shaped like that of a deer."

Feed Birds From Air

Altoona, Pa.—Feeding of birds from the air was declared highly successful the air was declared highly successful by officers of the Blair County Game Fish and Forestry association as Ed-ward Haynes, a commercial aviator, again took wing for a second day's flying over the snow-clad mountains to scatter feed and corn over the tree tops.

digested dishes.

Pie is so well
liked that it is more often served than any other des-sert. When it fa served with a fill-

ing as an open pie having less pastry, it is more easy of digestion. Lemon custard and dif ferent fruit pies are all among this class of pies. The following is a good lemon pie:

Queen of Lemon Pie.-Beat the yolks of three eggs. To one cupful of sugar add a tablespoonful of butter; when well creamed add a tablespoonful of flour and mix with the eggs. Grate the yellow rind of a lemon and squeeze the juice, add with one cupful of milk to the other mixture. Beat the whites of three eggs until stiff and fold in lightly, then pour into a lined pastry shell, unbaked. Bake slowly unti-thick and well browned.

Delmonico Pudding.—Turn a pint can of peaches with the sirup into a pudding dish. Heat one pint of milk in a double boiler, add one-third of a cupful of cornstarch stirred to smooth paste with one-half teaspoonfu of salt and one-half cupful of cold milk tir and cook in the hot milk until the cornstarch is thoroughly cooked Cover and let stand for a few minutes Beat the yolks of two eggs, add one third of a cupful of sugar, beat again add to the hot mixture, continue beat ing until the egg is cooked, then pour over the peaches. Beat the egg whites until stiff, add four tablespoonfuls of sugar, cover the pudding and place in slow oven at first, then brown quickly. Serve either hot or cold.

Prune Patties.—Take one-half cup-ful of stewed prunes, stone and mash add one beaten egg yolk, a pinch of salt, a grating of nutmeg, a teaspoon-ful of flour and sugar to taste, a half cupful of sweet milk. Mix and pour into pastry-lined patty pans. Bake until a light brown. Spread the tops with a meringue made from the e white and a little sugar. Brown lightin a moderate oven,

Maple Junket.-Warm just luke warm, one quart of milk, add one dis-solved junket tablet, one-third of a cupful of maple sugar and pour into sherbet cups. Serve when firm with grated maple sugar and cream. If the maple sugar is not to be obtain brown sugar with a few drops of ple flavoring.

Dresden Crumbs. — Melt chocolate and stir in as many dry, finely grated crumbs as the chocolate will cover. Serve with cream and sugar.

Food Suggestions.
A pretty salad for a party is prepared as follows: Place a slice of pine-

apple on a tender lettuce leaf; in the center of the pine-apple place half of a banana and top with a red cherry. Pass salad dressing or heap a spoonful on the side of the

Cream of Onion Soup.—Sifee four onions and cook in boiling water until soft, changing the water once during the cooking. When tender, rub the onions through a sieve and to a cupful of the pulp, prepare the following: Melt a tablespoonful of butter; when hot add two tablespoonfuls of four. Stir until the mixture leaves the sides of the pan, then add three cupfuls of cold milk and cook until smooth; after ten minutes add the onion and the liquid in which they were cooked. Boll

up once and serve. Hot Water Ginger Bread.-Take one cupful of sugar, one beaten egg, a half teaspoonful of salt, one-half cupful of melted shortening a tablespoonful of ginger, one cupful of molasses, and three cupfuls of flour. Mix and stir until well blended, then add one cup-ful of boiling water into which is stirred a scant teaspoonful of soda. Stir and beat until well mixed, then pour into a well-greased dripping par and bake 40 minutes. Serve hot cu into squares with cottage cheese and apple sauce. This dessert is especially good with whipped cream.

Salsify Soup. Scrape and clean,

three bunches of salsify cut into dicand soak for 15 minutes in cold water Drain, cover with boiling water and cook until tender. Add a quart of milk, butter, sait and pepper to season. Bring to the boiling point, add three milk crackers (rolled) and serve at

nce. Spanish Eggs.—Cook together one cupful of stewed tomatoes and a clovof garlic finely minced, one chopped onion, two sweet green peppers chopped. Cook gently until reduced to half. Spread on thin slices of buttered toast and lay a posched egg on

Hash Roll.—Prepare a rich biscuit ough and roll out one-half inch thick. Spread with hot, moist and well-se oned hash. Roll up and bake in a rich brown or tomate sauce.

Is your car a General Motors Car?

F YOU own a Chevrolet, a Pontiac, an Oldsmobile, an Oakland, a Buick or a Cadillac, you own a General Motors car.

"But what," you may ask, "does that mean to me?" It means just this:

General Motors is a family of companies building motor cars and trucks and such other famous automotive products as Fisher Bodies, Delco and Remy electrical systems, Harrison radiators and AC spark plugs. Still other General Motors products are Delco-Light electric power plants and Frigidaire electric refrigerators. There are General Motors plants in 44 cities, employing 120,000 people; and sales and service organizations in 144 countries.

General Motors uses the combined resources of this great family for the benefit of each member. It effects great savings in the purchase of quality materials; it provides the best of engineering talent; it maintains the world's largest research laboratories and proving ground for automobiles; and it assures the permanence of its various divisions and the products which they make.

In other words, General Motors has every facility and every incentive to maintain quality and to offer value for the price; and the current models of General Motors cars are offered as the greatest values in the history of the automobile industry.

Broken Umbrella

One rainy day as I was going to work my infe gave me, an unbrella which was broken. It would open without pressing the button. Thinking It was better than nothing on a rainy day I took it. When I got on the street car it was crowded so had to stand. Suddenly the umbrella opened up and with it lifted the dresses of the women around. I was never so em-barrassed in all my life.—G. W. in Chicago Tribune.

DAWSON, ONCE PRIDE OF YUKON, IS FADING

Scene of 1900 Gold Rush Slip ing Into Oblivion.

Dawson City, Yukon.-A bunch of the boys no longer whoop it up in the Malamute salon, nor is there a rag-time kid available to hit a jag-time tune on the music box. The episode dealling with the demise of Dangerous Dan McGrew and the reign of the lady known as Lou are but vague memories of bygone days as far as this town is concerned.

When Robert Service wrote the

"Shooting of Dan McGrew," the Mala-mute saloon was one of the many bright spots during the mad gold rush of 25 years ago. Tegether with scores of other such places, it played host to the hordes the frenzied gold-seekers. Today, with its kindred resorts, it stands in the last stages of decay.

From the status of a thriving city of 30,000, Dawson City today has dwindled to a struggling village of less than 1.000.

Dawson's mushroom growth had its enesis in the great Klondike strike of 1900. Miners, adventurers, con men and courtesans swept into the frozen city of the North. Fortunes were made and lost over night. The miners made the fortunes, the hangers-on mulcted them. Winnings at the faro tables in the scintillating gambling halls went the same way. Thousands dragged their bodies over the frozen wastes— many to fall from exhaustion before the journey ended—to the gold-mad city. The North exacted a heavy trib ute from those who would wrest for-tune from the ground.

With the exception of the Califor-

with the exception of the Camor-nia strike of '49, the rush of 1900 was the richest in the history of mining. Hundreds of millions of dollars in dust and nuggets was taken from the ground. For more than ten years the yield stood up under the terrific

pressure.

Then began the fading of the strike.
From 1900's peak of \$22,250,000 gold
production in the territory dropped to
\$1,450,000 in 1924. Treasure-seekers
dwindled and other sources received
the representations.

REVEALS SECRET OF **ROMANOV MALE HEIR**

Merchant Savs Russ Consul Sought "Magic" Water.

New York.—A fantastic "Imperial secret" that had its inception on a New York farm and its conclusion in the court of the Romanovs has been told after 20 years of silence by Edward Hatch, a New York merchant, former member of the firm of Lord & Taylor. The story began in 1908. The ill

luck of the Romanov dynasty re-strained Mr. Hatch from revealing it for many years. Then it grew dim in memory and retrospection made its In memory and retrospection made its details even seem more improbable. He continued to keep quier until a few days ago when, he said, he talked with a woman who had been close to the former German court, and she told him an anecdote which corroborated his story. his story.

Tells of Farm Hoodoo.

This was Mr. Hatch's story: In 1903 a New York newspaper pub-lished an account of the lamentable state of affairs on the Hatch farm near Brewster, N. Y. Eighty-five per cent of all the animals born there were males, said the paper. Bulls that might have sold for thousands of dol-lars went to the butcher for what they would bring because the market was flooded. A flock of 30 ewes bore 26 males. All the chickens were roosters. Even the turkeys and carrier pigeons suffered from the hoodoo. The ouse cat had seven kittens and six were tom cats.

A hired man and his wife on the farm had five sons. Even the corn would grow only on stubs and scientists said it was male corn.

Soon after the story was published, Mr. Hatch said, a stranger questioned him about it at his store. He wanted an explanation. Mr. Hatch said he thought it might be water, which analysis had shown, contained much phosphorus and magnesium.

The stranger then introduced himself as the Russian consul. He wanted

a sample of the water. Mr. Hatch agreed.

A few days later the stranger appeared at the farm with two uni-formed attendants. With considerable ceremony they filled a keg with the water. The consul insisted on sealing the bung himself, with elabo-rate rites. Mr. Hatch asked for what purpose the water was wanted. The only answer he could get was: "Just an experiment."

Russian Male Heir Born. A year later cable dispatches reported that a male heir had been born to the imperial Russian throne. The preceding children of the czar had bee

Mr. Hatch called on the Russian Mr. Hatch called on the Russian consul. His questions were evaded, and when he became insistent the consul pointedly changed the subject. The merchant's father advised him to keep the episode to himself, and he did so until he heard the recent anecdote attributed to the German court doctor. attributed to the German court docto of that day, which seemed to corrobo-rate the implications of his own ex-

Says Bobbed Heads

Cause Loss of Hair

New York.—Women who bobbed their hair seven years ago have 50 per cent less hair now than they had then, Frank Parker, hair expert, told several hundred members of the Amer ican Master Hair Dressers' association.
The association opened its two-day annual convention at which was sounded the keynote, "Death to the bob!"

Tight hats worn by women with short hair, duplicating the condition short hair, duplicating the condition to which common baldness of men is attributed, may be the cause of the loss of hair by women, Mr. Parker said. Charles Nessler, president of the association, made the same state-

"Nature must compensate for this discouragement to hair growing on the head, and it has been predicted that a race of short-haired women will be a race of bearded women," said Mr Parker. "I think the bob is do however. In 1878 women did the same thing. They cut off their hair and murdered the hair dressing business In 1893 they did the same. Both time

Walks 43,800 Miles to

Toll Clock Each Hour

Luray, Va.—Walking 43,800 miles— all in the night time—is the record established by H. Monroe Duncan of Euray, for the past 30 years night watchman at the Deford Tanning company of this place." During that time Mr. Duncan has tolled the Deford com-pany's night clock every hour from 6 o'clock in the evening until 6 o'clock the following morning—a total of more than 131,400 times. He has been dubbed "Luray's walking night barom than 131,400 times. He has been dubbed "Luray's walking night barom eter," often deciding disputes as to the character of the meather at certain hours of the night. J. W. Smith, an egineer at the same place for the past 35 years, has walked approximately 25,540 miles in the discharge of his duties between midnight and

NEW TORCH MELTS STEEL UNDER WATER

Will Be Used to Open Hull of Wrecked Submarine.

New York.—A torch that can melt and cut steel at any depth under wa-ter has been perfected by the United States navy, and will be used in openng the sunken submarine S-51, nor on the floor of the ocean off Block land, Commander Elisberg of the Brooklyn navy yard has told a re-

porter. Such a torch is hailed as a valuable aid in cutting through the steel plates of submarines and submarine compartents. It was the lack of an ade justely powerful torch that prevented the piercing of the submarine S-51 last fall, after it was rammed amidships by the steamer City of Rome in Sep-tember. At that time acetylene torches were used, and they were practically useless when forced to pressure of more than 20 pounds under water. The new torch consists of jets of hydrogen and oxygen which emanate

from two separate sleeves to the tip of the torch. From a third sleeve comes compressed air. When the com-pressed air is applied at any depth ressed air is applied at any depth inder water it forces an air bubble to surround the hydrogen and oxygen.
Thus protected from the water, the fire within the bubble of air is fnjected into the steel. It usually reaches a stemperature of 5,000 degrees Fahrenheit, according to Commander Ells

The steel plate melts. From the time the fiame is applied the steel plate, usually an inch thick or less on submarines, can be cut at the rate of a foot a minute.

The Bavy has been experimenting

on the torch for several years. When the submarine S-51 sank, the torch was in the experimental stage.

With the aid of the tarch, it will be possible to get into the innermost compartments of the submarine Hole will be burned in the hull of the marine, as well as in the walls of the compartments, and the com-pressed air will be forced into the boat. pressed air will be forced into the boat, thus driving out the water and making the craft more buoyant.

The bodies of 24 men are still in the submarine, it is believed, and these will be taken out probably before the submarine is lifted to the surface.

Working Model of Solar System Built by Alien

Chicago.—A mechanical model of the solar system which, according to Professor F. R. Moulton, head of the department of astronomy at the University of Chicago, shows more of the facts of the motion of the earth and moon than any similar machine, is the result of seven years' spare time la-bor by Diego Arzic, a Jugo-Slav immigrant.

Arzic was educated as a mechanical A rzic was educated as a mechanical engineer at the Technical School of Marine Engineering at Pola, Jugo-Slavia, and came to Chicago in 1912. Chancing to read a book on astronomy, he became intrigued by the mechanics of the universe and determined to construct an accurate model in minto construct an accurate model in miniature.

He spent three years of minute cal-ulations before he began constructing his model. The work itself required four years' labor in the little shop at the rear of his home here, with the simplest of tools. He frequently worked all night, refusing to stop even for meals.

An electric-lighted ball represents the sun in Arzic's machine. The ma-chine is motivated by a clock, registering central time, the day, month and year, and operating 110 gears that control movements canning in time from one minute to 12500 years. Thus, the position of the models at a given second corresponds to that of the plan-ets. and the movements of the moon around the earth and the earth around the sun are portrayed with correct periods and eccentricities. The entire mechanism is mounted on an elliptical frame sine feet in diameter.

"In my opinion the machine is very remarkable mechanism," said Professor Moulton. "It makes particu larly clear those features which are found difficult to teach."

Coolidge Accepts Wildca on Behalf of National Zoo

Washington,-President Coolidge has accepted as a gift a young wildcat which until recently roamed the Great which until recently roamed the Great Smoky mountain of Tennessee, but he specified that shipment was to be made direct to the National zoo. The made direct to the National 200. The eat was caught in Sevier county, Ten-aessee, which the Great Smolly Moun-tain Conservation association advised the White House was the "strongest Republicant county in the country in 1924."

********** Thread From Eye; Sees After 11 Years

an egineer at the same place for the past 35 years, has walked approximately 25,540 miles in the discharge of his duties between midnight and noon. Mr. Smith, it is estimated, has blown the concern's whistle a total of 306,600 times, not counting the filmes he has sounded alarm at outbreaks of fire in Luray.

Lived on Water

Paterson, N. J.—Mrs. Samuel Woiff hast lost 80 pounds and her autointoxication by living 16 days on water.

Blackbeard, the Arch Pirate

A TALL, powerful man with a fierce expression, which was increased by a long beard which grew from below his eyes and hung down to a great length. This he plaited into many tails, each one tied with a colored ribbon and turned back over his ears. When going into action, he wore a sling on his shoulders with three pairs of pistols, and stuck lighted matches under the brim of his hat."

A pleasant picture? Yet, that is what many an ill-fated ship's crew saw when, after a shot had been fired

what many an ill-fated ship's crew saw when, after a shot had been fired across the bows of their vessel, there came aboard the renowned pirate leader. Capt. Edward Teach, alias Thatch, alias Tach, alias Drummond, alias Blackbeard. As Blackbeard, he is best known, and as Blackbeard he is well named the "arch pirate." For in addition to being an eye-filling spectacle, Blackbeard comes nearest being the typical pirate of fiction of any ing the typical pirate of fiction of any

who ever sailed the Spanish Main.

A peculiar sense of humor had this buccameering worthy. One day, flushed with wine, he assembled his crew on deck and addressed them as follows: 'Come, let us make a hell of our own and try how long we can bear it."
Thereupon he forced several of them
to accompany him below, where they
shut themselves in the hold and set fire to several pots of brimstone. They stood it as long as they could, then, choking and gasping for air, they stum-bled out of the inferno. But the last to come was Blackbeard, who ever afterwards boasted of his hardihood.

Upon one other occasion he sat in his cabin with several of his fellows. Suddenly the pirate leader blew out the candle, and drawing his pistols began firing them under the table. One gan iring them under the table. One of the guesta, Israel Hands, his sailing master (Stevenson "borrowed" Hands from real life to be a character of fiction in "Treakure Island") was severely wounded in the knee, and the only explanation offered by the playful pirate for his conduct was that "if he did not shoot one or two of them now and then, they'd forget who he was."

A much-married man was Captain Teach. At one time he surrendered to Teach. At one time he surrendered to the governor of North Carolina and was pardoned for his crimes. They became great friends, and when Teach confessed that he was in love with a young lady of that province—she was only sixteen years old—the governor was delighted to perform the wedding ceremony. Teach coyly confessed that this was his fourteenth venture into matrimony, and it was common gossip that there were no fewer than twelve that there were no fewer than twelve Mrs. Teachs still living in different towns in the West Indies.

Blackbeard Takes to Piracy

IN 1716 a certain Captain Teach who had served an apprenticeship in lawlessness as a privateer out of Jamaica, "went on account." He was put in command of a sloop by the pi-rate, Benjamin Hornigold, and the two leaders set out from Providence for the American coast. In the West In-dies they took their first prizes, then continued on to the coast of Virginia, where they captured a fine French vessel engaged in the Guinea trade.

this Teach mounted 40 guns and re-named it the Queen Anne's Revenge. His first capture was a big ship named the Great Allen, which he plundered and burned. Attacked by H. M. S. Scarborough, the pirate drove off the man-of-war after a snarp engag-ment and continued on his way. His next victim was the sloop of the pi-rate leader. Maj. Stede Bonnet, whom

Teach, in a high-handed manner, de-prived of his vessel and put one of his own men in command. Blackbeard's captures were number-less. One of them was a ship bearing the curious name of the Protestant Caesar which Teach burned, not be-cause of her name but because she was from Boston where a number of pirates had lately been hanged. He now turned to the Carolina coast, now turned to the Carolina which had just been suffering

outside the port of Charleston, S. C., and capturing every vessel that tried to enter or leave port. On one of these were several prominent citizens of the colony, whom Blackbeard held as hostages. Then he sent word held as hostages. Then he sent word to the governor of South Carolina that he was in need of medicines, and unless they were sent forthwith, everyone of his prisoners would be killed. There was some delay in acceding to his demands, and the pirate set about to put his threat into execution. Fortunately, however, the medicine chest varieties in time to see Wishell lessons. arrived in time to save their lives.

arrived in time to save Æheir lives.

Despite his many successes, Teach's life was not a bed of roses. He had unruly men for his crews, and he had to rule them with an iron hand. There has been preserved from his journal (he was a somewhat literary, pirate, too, it seems!) the following entries: "1718—Such a Day, Rum all out—Our Company somewhat sober—A. 6—d Confusion amounts relations. —A d—d Confusion amongst us!— Rogues a-plotting—great Tatk of Sep-aration—so I look'd Sharp for a Prize Rogues a plotting—great Talk of Sep-aration—so I look'd Sharp for a Prize. 1718—Such a Day. Took one with a Great deal of Liquor on Board; so kept the Company hot, did hot, then all Things went well again." Such a day, indeed! And these only two of many in his infamous career

Radio Messages

to Other Worlds?

Recent discoveries, made known by the president of England's Royal As tronomical society, indicate that the little dark star on which we live is situated not far from the center of the greater universe, something man in his conceited ignorance has always believel. . . For every sun, or twinkling star in space, there are many more dark stars or planets, which shine, if at all, by reflected light. This destroys one of primitive man's illusions that the sky and sun and stars were all created for the benefit of himself and, his fellows

alone. In these millions of unseen worlds there must be others similar-ly situated as our earth, on which the same forms of life have appeared and exist. One of these days radio may be perfected to the point where the people on one planet may exchange messages with those on another. It is a far-distant probability but not an impossibility. Capper Weekly.

London's Growth

By 1930 London will be a city 11,000,000, according to Lord Ashfield in his report to the directors of the Underground railway of the world's metropolis. The popula-tion today is 7,500,000. Twenty years ago the average person used the underground 158 times a year, but today each person uses it 460 times a year, according to Lord Ashfield's study. The transportation lines in London, including the busses and tramways, carry 3,500, 000,000 passengers annually. Lord Ashfield was at one time general manager of the Detroit electric rail-

Canada Values Helium The premier of Ontario, Canada, ced that a deposit of helium has been discovered at Inglewood bout forty miles northwest of "The province has taken over the helium rights at Inglewood," declared the premier, "and am informed that they have the highest content of this gas of any in the British empire. The wells have been turned over to the University of Toronto for research work." Secrecy respecting the discovery, the premier said, had been maintained "because of the tremendous importance of the find." -Pathfinder Magazine.

Spread American Methods Nine of thirteen students from

foreign countries attending Loyola university, New Orleans, are preparing to take American dental methods back to their homes. The university has thirteen students from ten countries other than the United States, and nine are en-rolled in the school of dentistry. Three are studying pharmacy and ne is applying himself to the schools of arts and sciences. Guate mala leads, with four, followed by Mexico and Cuba, with two each.

Constant Static

The Blue book of the meteorological office of the British government states that there are at least 100 lightning flashes every second, year in and year out, winter and summer, somewhere in the world. The world experiences 16,000,000 thunderstorms a year, of an average of 44,000 a day, according to the book It is calculated that in any given second there is released from the clouds more energy than the world's water-power stations produce in six

The Reach of the Spoken Word

WHEN the small family group of primitive man expanded into the cave community, a means of communicating beyond the normal range of the voice became imperative. Then someone discovered that by making a speaking-trumpet of his hands, he could increase the reach of the spoken word, could add new effectiveness to the human volue.

Other means of transmitting intelligence, in their turn, were found to serve the needs of man: the signal drum and the beacon fire; the written message, carried by runner, by rider, by water or by rail; and finally, the telegraph.

But these messages, however carried, lacked the direct and personal qualities of conversation. They were but symbols of speech, the shadows of the spoken word.

Then, fifty years ago, came the telephone. A half-century of scientific research has extended the reach of man's voice to thousands of miles. The Bell System's vast network of lines provides a service nationwide in scope. The American continent today is no larger, from a communication standpoint, than was the prehistoric community in which the cavemen shouted from cliff to cliff.

THE PARTY FRIDAY, April 9, 1926

"Cal Made Friends Who Stick" There was a fine, honest home ness in all the comments which he late Colonel Coolidge made during the weary days when he was awaiting the passing of the spirit. His tribute to the president's wife which he whispered to companionable newspaperman sitting beside him, properly ranks as one of the finest.

However chary of words the old Roman had been during his working hours, his real feelings came to the surface when speaking of the president's wite he said, "Grace has always been helpful to Cal. He was fortunate in getting so fine a girl for a wife. People take to

In these days when every female is a lady, and when marriages are natters of contract, and when being kind to older folk is regarded as a lost art, it is well to have it impressed on us once again that. there are "girls in the world, and that people do take to them," and that being kind to folk even in the family circle is still a virtue worthy of commendation-

And equally worthy of being

wave range of the outfit is from 75 to 140 meters and its communication range approximately five miles, sufficient to enable all units of planes in formation and squadrons to keep in perfect liaison. A fixed aerial is fitted around the fuselage
